

- Paradox Pro Passive Infra-Red Detector
- The Paradox Pro PIR is an intruder detector designed to detect human body movement in a protected area. It has a high immunity to false alarms and outstanding stability. Built in tamper sensors protect against opening
- Power - 12V DC from the alarm Panel
- Installation Height Calibration
- Automatic Temperature Compensation
- Metal Shield maximises protection from EMI and RFI
- Detection method - Analogue with Single element sensor
- Anti-Tamper switch
- Solid state relay
- Coverage - 11m x 11m, 110deg viewing angle
- LED indication
- Three Year Warranty
